Negotiations underway. First meeting last week, next on the 15th. We brought forward some requests, nothing brought forward by the city yet. More to come.

Grievance regarding engineer certification occurred over the last weeks. Most have heard about it, admin staff sent a fire dept. All email with details about the resolution.

Judge reports, grievance was received, committee was formed, deemed meritorious, engineer recert process failed to follow process as written, admin agreed a mistake was made, resolution settled on to extend recently expired certs until a recert opportunity in the fall. Judge notes as we hold admin to following process accurately we can expect to be held to the same.
